Computing
Can I use technology responsibly?

CREMYLL AUTUMN 1 2023

I know that technology is all around us.

▶ We learnt technology is not just electronics (though we thought this at first) it is anything that has been made to help us.

We found lots of technology that helps us in our classroom.

Technology around us

Technology is not just electronics, a pencil is a technology as it has been made by people to help us write.
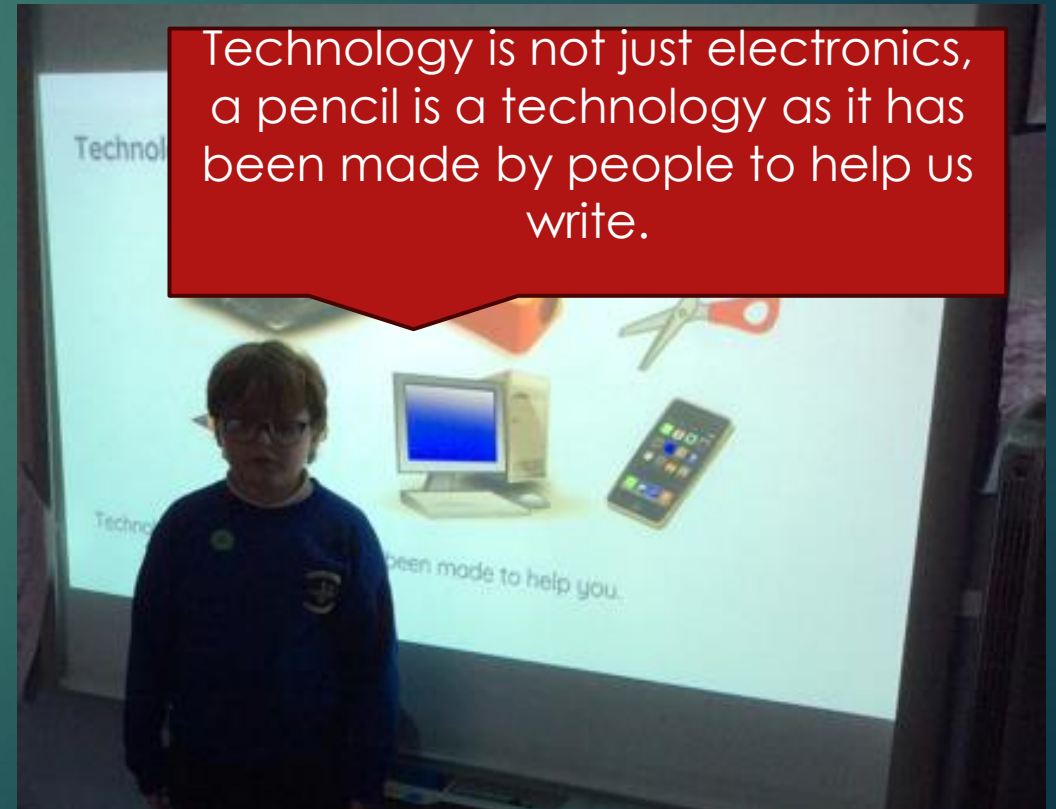

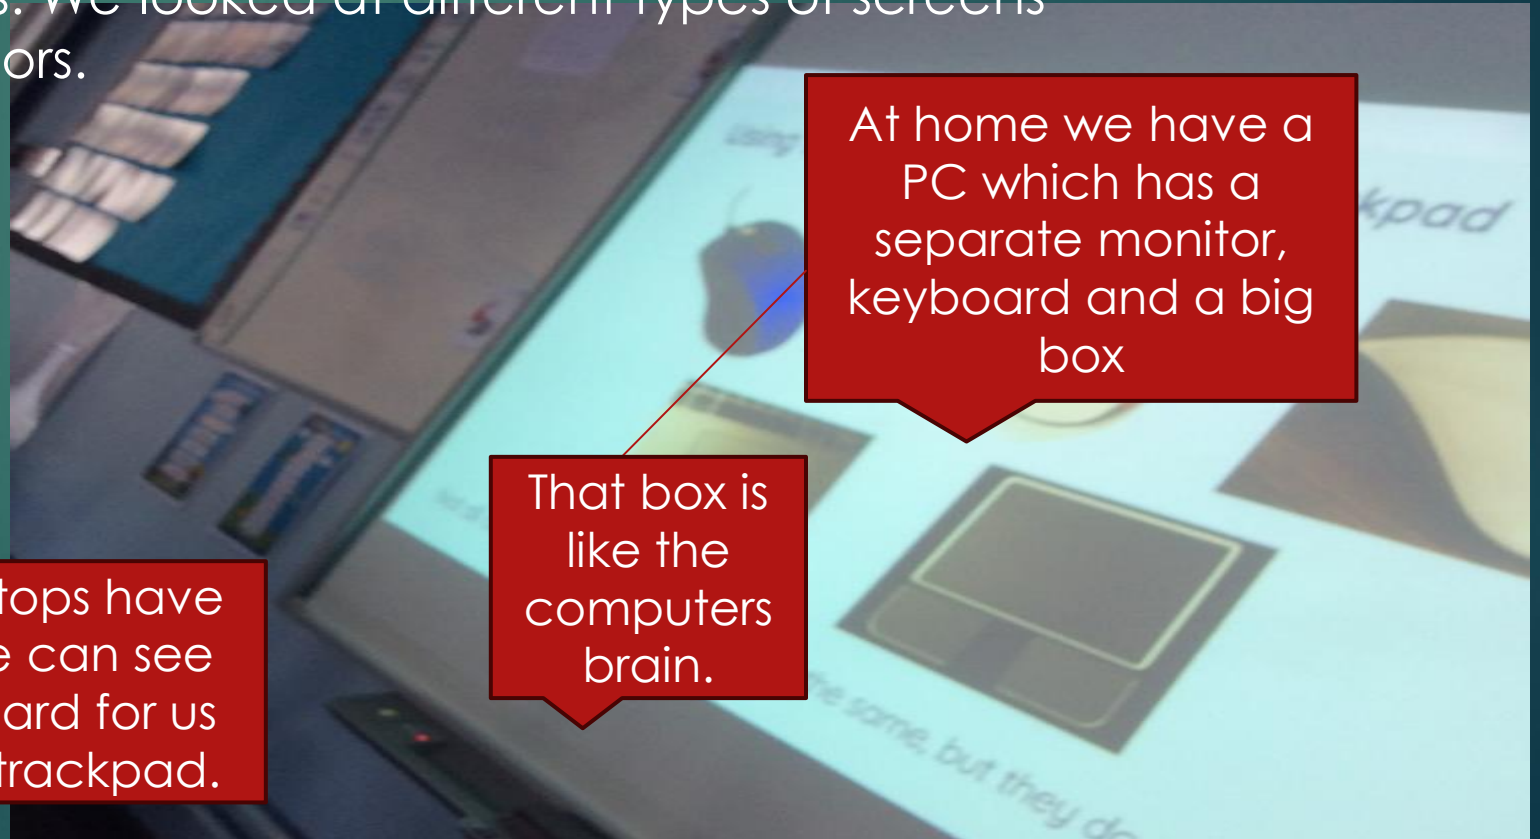

I know the parts of a computer

▶ We learnt that although computers come in different versions they all have the same parts. We looked at different types of screens which are called monitors.
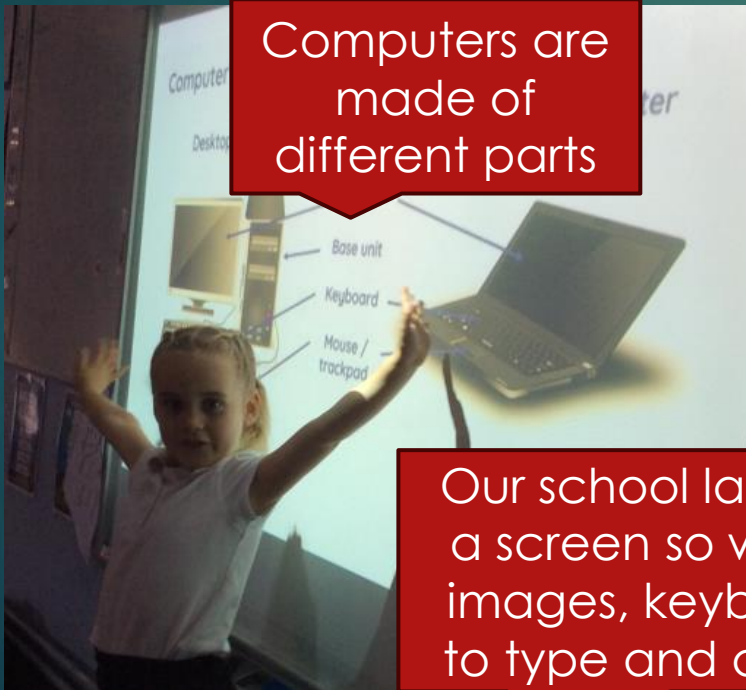

I can use a mouse responsibly

The screen helps you to see what you are doing

▶ We found out that the mouse on a laptop is called a trackpad and you use your fingers to move it gently. On a computer the mouse can be separate, and you move it on a mouse pad. You can see a cursor on the screen to show where you are moving it.

On a laptop the mouse is called a trackpad

On a mouse you click the button to select but on the trackpad you press down hard.
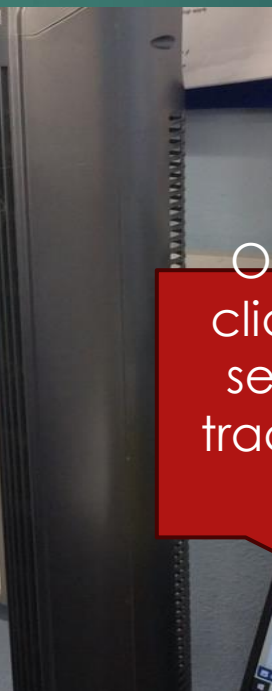

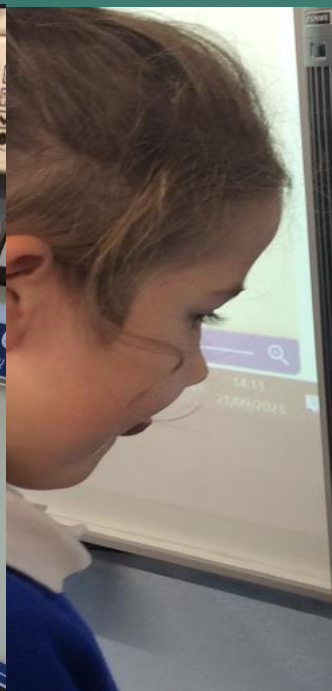

I can use a keyboard responsibly

▶ We used a digital keyboard, which is one built into our school ipads. We typed up our names. I was tricky to do as the keyboard letters aren't in alphabetical order.

A keyboard is for sharing messages.

It helps you type up

You can get keyboards attached to laptops but on an iPad it is digital.

Keyboards have letters, numbers and symbols.

I can use technology responsibly.

We took all our skills and used the paint program as this involved using mouse and keyboard skills. We needed steady hands to draw using the trackpad.

You need to hold it carefully

Only use apps you trust

Take care of it and ask permission

Don't share your password

Computing   FLE Y1/2   Can I use technology responsibly?

Forever Facts

Technology is something that can help us.

A computer is an example of technology.

Rules are needed when using technology.

Skills

To recognise the main parts of a laptop.

To use a keyboard to type.

To use a mouse in different ways.

What I have learnt before: new learning.

Exciting Books

WORKING WITH COMPUTERS AND ROBOTICS
INCLUDES PROJECTS FOR YOUNG ENGINEERS

Our Endpoint

To use technology responsibly

Subject Specific Vocabulary

Keyboard	The set of keys on a computer or typewriter that you press in order to make it work.
Mouse	A small device that moves a cursor on your computer screen.
Edit	To make a change to something.
Cursor	A small symbol on the screen that shows where the mouse is.

Personal Development: The real- life knowledge that links is: following rules and using technology responsibly. The jobs it can be used in are: ICT teacher, computer technician, programmer.
