

# Science Spring 2 2024 FLE YR 1/2 Why do animals choose the habitats they have?

## What I have learnt before:

- The names of some animals and how some live in different countries such as Africa.
- We have seen some animals on our zoo trip.
- Some habitats from our English books such as fish and owls.

## Forever Facts

I know the names of plants and animals in a range of habitats.

I know how a specific habitat provides for the basic needs of the things that are living there.

I know how some animals find their food.

## Skills

I can match animals to appropriate habitats.

I can identify things that are living, dead or have never lived.

I can explain a basic food chain.

## Endpoint:

I can take part in a group presentation answering the key question.

## Exciting Books

## Personal Development

- Children will learn to appreciate and care for their local environment.
- Jobs useful for: marine biologist, Zoologist.

## Subject Specific Vocabulary

Habitat	A place where an animal lives that provides the animal with food, water and shelter.
microhabitat	A small area which differs somehow from the surrounding habitat.
Living	Something that can move or grow.
Food chain	A sequence describing how different animals eat each other.
Dead	No longer alive.
Never alive	Something that has never been able to move or grow.
