The background features a large, abstract graphic composed of several overlapping, semi-transparent circular bands. The colors transition from light blue on the left to a pale green on the right, with the bands overlapping to create a sense of depth and movement.

Computing

Creating media – digital painting

Cremyll Autumn 2 2023

I know how to use tools on paint when using a tablet.

The pencil is thinner than the paint brush

We looked at a range of painting tools and icons and discussed what they do, we first explored the PaintZ app using these tools then created our own images

If I change the pencil number to 50 – look at how thick my line is!

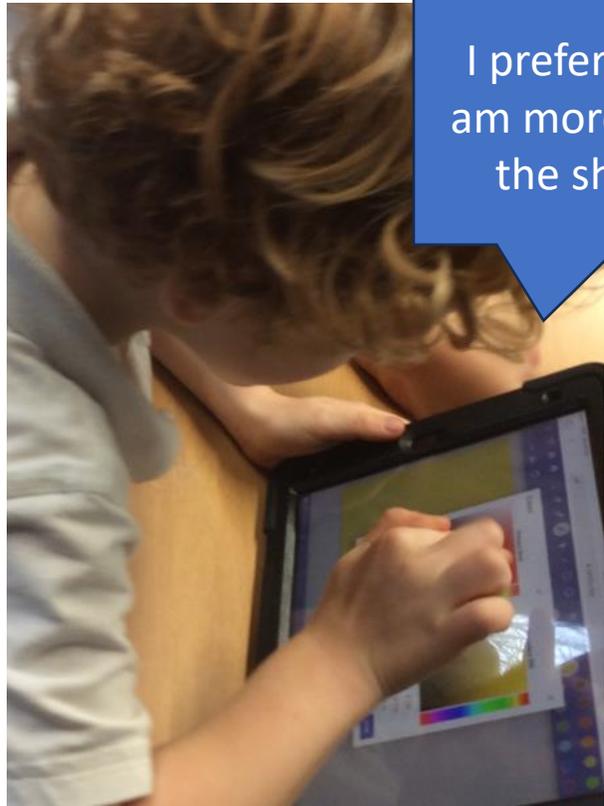

If you press clear it all disappears.

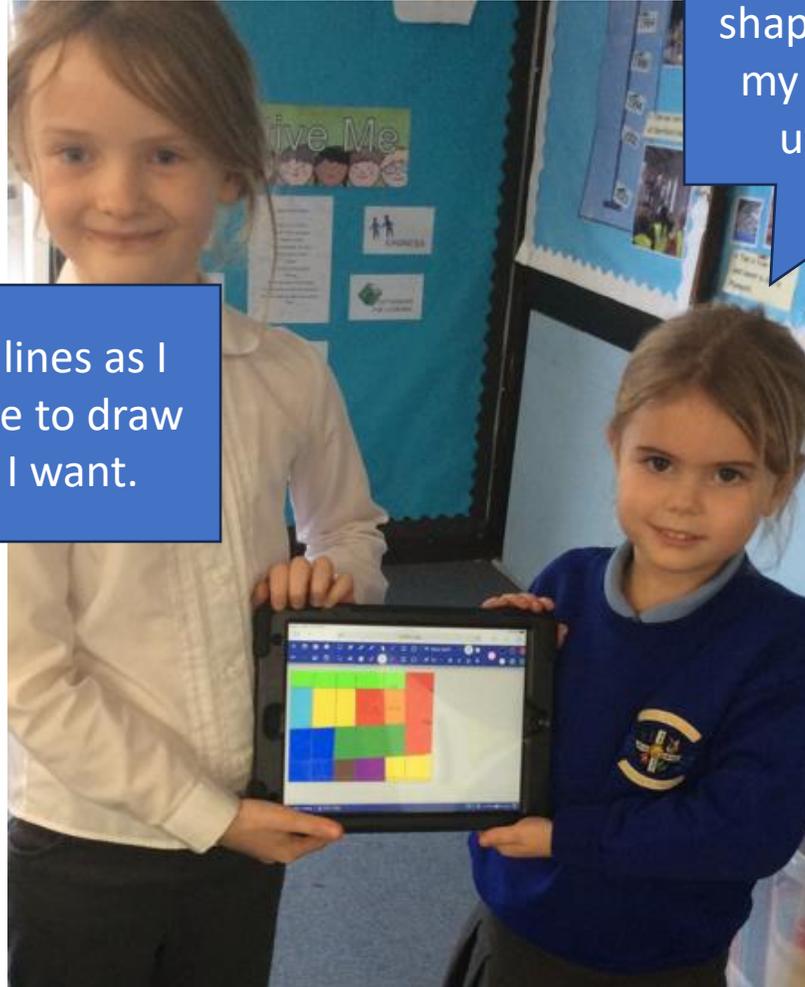

I can use digital tools to create lines and shapes.

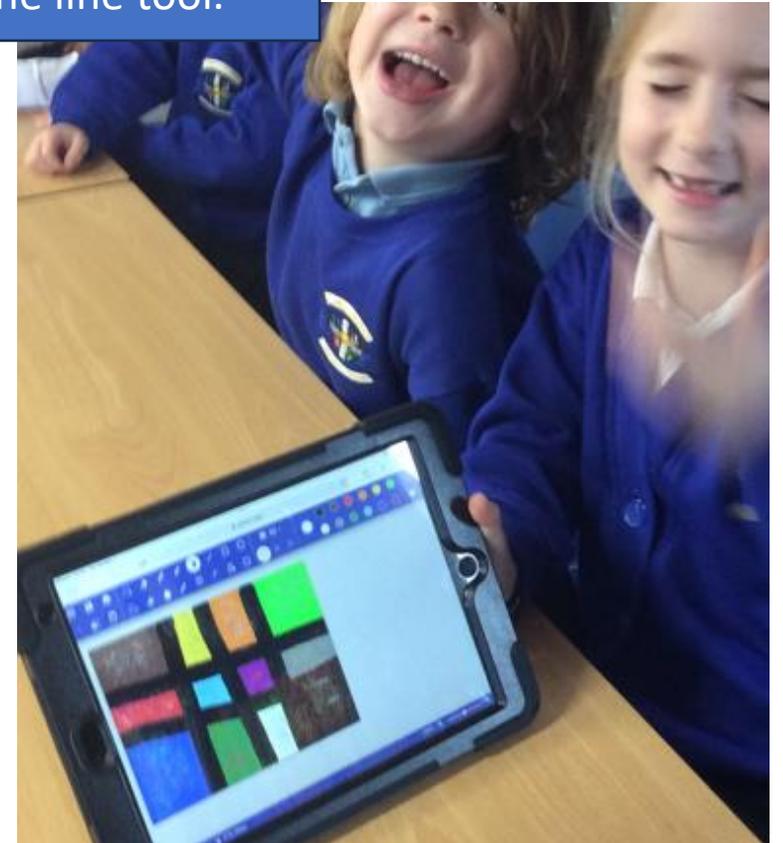

We used the shape and line tools to create pictures.

I prefer the lines as I am more free to draw the shape I want.

It was easier to put shapes together to make my picture rather than using the line tool.

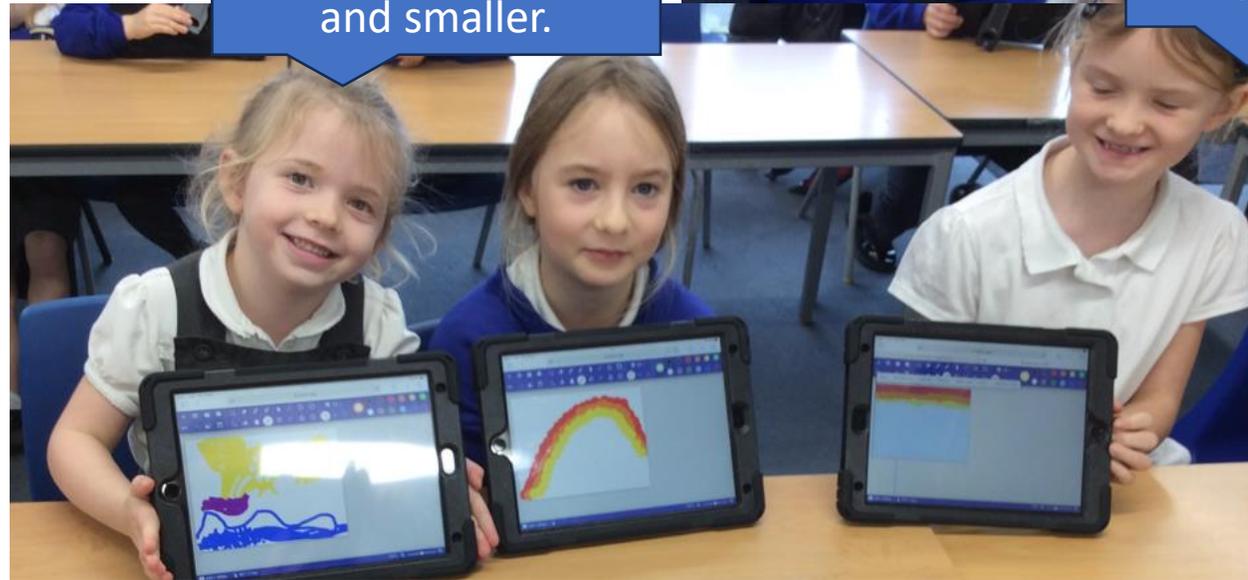

I can recreate an artist style in digital format.

We looked at an artist called George Seurat who used pointillism, this meant painting with dots. We then recreated his style on the iPad to create a digital painting.

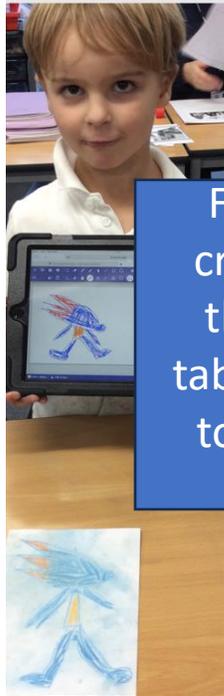

It is clever that George did dots so small to create that painting, I think it will be easier on the iPad though as all the dots will be the same size.

You can change the size of the dots to make them bigger and smaller.

Using dots to create an image made it easier and neater to do on the tablet.

I can create a digital painting and compare it to painting in a more traditional way.

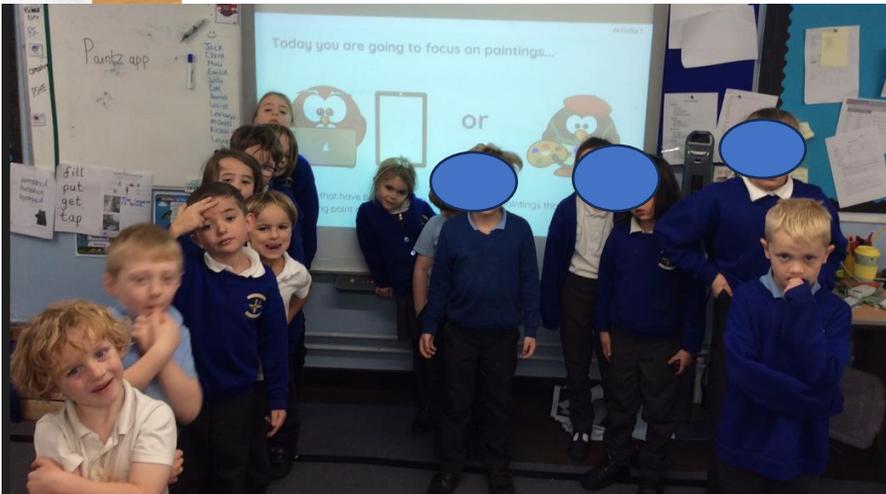

For our final lesson we used pastels to create an image in a traditional way, we then recreated the same image on our tablets in digital form. We used a range of tools on the PaintZ App then did a class vote on which style we preferred.

We are allowed to have our own favourites types of artwork, that's our individual liberty.

I prefer this style of painting as if I make a mistake, I can just delete it.

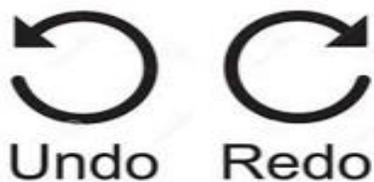

I like real life painting better than the digital one as it looks like it takes more skill.

The digital art does look more modern though.

Forever Facts

In paint programs there are different colours to choose from.

There are a selection of tools to use to create images.

To save a creation you need to click on file, then save.

Skills

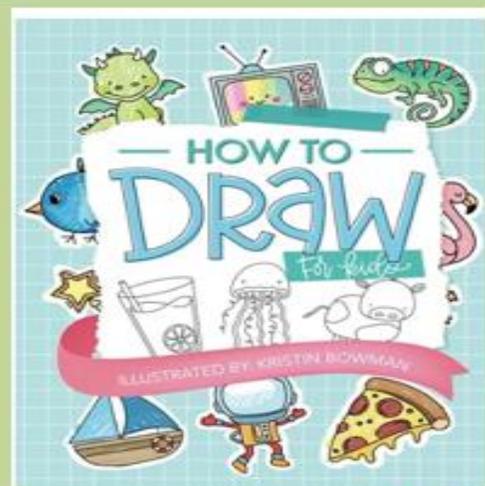

To use painting skills on a computer or tablet device.

To create shapes using a painting program.

To be able to save my work.

What I have learnt before: how to use technology responsibly.

Exciting Books

Our Endpoint

I can create a digital painting.

Subject Specific Vocabulary

Save	A command that keeps your document safe so you can see it again.
Undo	To take away the last action you did.
Font	The style of the text.
Fill	To make your shapes a solid colour.

Personal Development: The real- life knowledge that links is: technology can create art and not all images online are real. The jobs it can be used in are: graphic designer.
