

Geography Class Tamar Spring Term 2 How important is energy for our homes and country?

Personal Development

Children know where energy comes from and the advantages of renewable energy. They are aware that electricity is transported around the country and that renewable energy provides jobs.

Our Endpoint

I can say where our energy comes from.

**What I have learnt before:
Map and Atlases, UK and Europe.**

Exciting Books

Subject Specific Vocabulary

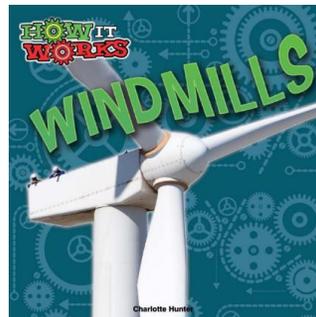

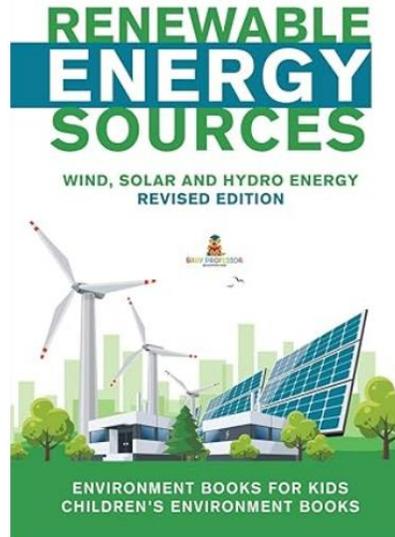

Energy	The ability to do something.
Fossil Fuels	Fuels from organisms millions of years ago, gas and coal.
Non-renewables	Fossil fuels cannot be reused again.
Renewables	Energy made from sources that nature will replace.
Solar energy	Energy that comes from the sun through solar panels.
Wind energy	Energy that comes from the wind through wind turbines.

Forever Facts:

Know that we need energy for our daily life.

Know that fossil fuels are non renewable energy sources.

Know that solar and wind power are renewable energy sources.

Skills:

Collect statistics and present them.

Express views and recognise how people affect the environment.

Suggest ways towards reducing climate change.
